

Product Spotlight

SurPRO 4000

International Cybernetics Corporation (ICC) has spent over 40 years manufacturing non-destructive test equipment for the governmental and consultancy industry. In those 40 plus years ICC has established itself as one of the industry leaders for its products. ICC supplies its customers with high quality hardware and software to meet their data collection needs. ICC staffs and keeps in house: hardware engineers, software engineers, mechanical engineers, technicians, administrative personnel, and engineering aids. If you were to ever have a problem it would be taken care of immediately.

ICC was established in 1975 and has been providing solutions to complex computer hardware, software, and service problems. ICC provides computer engineering consulting, contract services and integrated products to engineering technology companies, government agencies (DOT), and consultants worldwide.

ICC stands behind our products 100%. You will find that we offer an excellent product and provide the absolute best service and support in the industry.

ICC produces accurate, dependable data collection equipment for a reasonable price.

ICC currently supports network and project level data collection for:

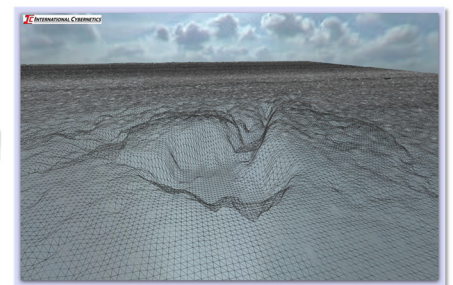

- Longitudinal Profile
- Transverse Profile
- Rutting
- Roughness
- Faulting
- Texture
- Ride
- GPS
- DGPS
- Cross Slope
- Geometrics
- Digital Imaging
- Distress
- Friction
- Deflection
